

EARL "TREYE" PEATROSS III

Cloud Security | Security Engineering | Security Operations & GRC

Azure • AWS • Microsoft Sentinel • Zscaler ZIA/ZPA • Rapid7 • IRS Publication 1075

Clarksville, IN (Louisville Metro) • Open to Remote • 225.305.9780 • earlpeatross9639@outlook.com • linkedin.com/in/earlpeatrossiii

PROFESSIONAL SUMMARY

Cybersecurity professional with 15+ years in IT and 4+ years in dedicated security operations, currently securing a government enterprise of 5,000+ endpoints and servers. Daily scope spans security monitoring and investigation in Microsoft Sentinel, Zscaler ZIA/ZPA policy engineering, Rapid7 vulnerability management, Okta identity and access administration, cloud security visibility across Azure and AWS, and GRC work applying IRS Publication 1075 safeguarding requirements to cloud and on-premises systems. Prior Azure security background covering Conditional Access design, Privileged Identity Management, and Microsoft Defender across client tenants. Owns security problems end to end, from determining whether security controls are breaking legitimate business access to remediating penetration test findings and building vulnerability assessment infrastructure. Holds a B.S. in Cybersecurity and Information Assurance (conferred) plus CompTIA PenTest+, CySA+, Security+, and ISC2 SSCP, with the ISC2 CCSP exam scheduled to formalize a deeper move into cloud security. Targeting remote cloud security, security engineering, and cloud GRC roles.

CORE TECHNICAL COMPETENCIES

Cloud & Identity Security: Microsoft Azure, AWS security visibility (GuardDuty), Okta IdP (SSO, MFA, lifecycle, per-application access policy), FIDO2 / phishing-resistant MFA, least-privilege access design; prior Entra ID / Azure AD, Conditional Access, geo-fencing, and Privileged Identity Management (PIM)

Zero Trust & Secure Access: Zscaler ZIA, ZPA, ZCC, ZDX, ZTPKI, ZTNA application access policy, URL/category and SSL inspection policy, secure web gateway troubleshooting, Skyhigh CASB

Security Operations & Detection: Microsoft Sentinel, Rapid7 InsightIDR/InsightVM, CrowdStrike Falcon, Microsoft Defender, alert triage and investigation, log correlation, malware and threat analysis, incident response

Vulnerability & Risk Management: Rapid7 InsightVM console and distributed scan engine architecture, CVE analysis, penetration test finding remediation, patch cycle management, remediation tracking to closure

GRC & Compliance: IRS Publication 1075, NIST, HIPAA, GDPR, CIS Benchmarks and CIS-CAT Pro, baseline hardening, POA&M contribution, security control review, access control governance, security policy, documentation, audit readiness, risk reduction reporting

EDUCATION

Western Governors University | Bachelor of Science, Cybersecurity and Information Assurance | Degree conferred 2026

CERTIFICATIONS

Earned and Active: CompTIA PenTest+ • CompTIA CySA+ • CompTIA Security+ • CompTIA Network+ • CompTIA A+ • CompTIA Project+ • ISC2 SSCP • ISC2 Certified in Cybersecurity (CC) • ITIL 4 Foundation • LPI Linux Essentials • NVIDIA Building AI with Multimodal Models (11 active)

Scheduled / In Progress: ISC2 CCSP (Certified Cloud Security Professional), exam scheduled. Not yet earned.

PROFESSIONAL EXPERIENCE

Louisville Metro Government

Jan 2024 to Present

Information Security Specialist | Scope: Cloud Security, Security Operations, Zero Trust Access & GRC

- Own Zscaler policy operations (ZIA, ZPA, ZCC) across a 5,000+ endpoint government enterprise: investigate web blocks, URL and category policy denials, SSL inspection conflicts, and ZPA application access failures, determining whether a security control or the application itself is breaking legitimate business access, then tuning policy so users are restored without weakening the control set.
- Serve as the security escalation point for end users, application owners, and infrastructure teams, tracking work through TDX from intake and triage to root cause, remediation, stakeholder communication, and documented closure.
- Took ownership of a vulnerability identified during a penetration test of the environment: investigated the affected systems, implemented the immediate fix to close active exposure, coordinated with system owners on impact, and scoped the deeper remediation now in progress to eliminate the underlying weakness.
- Architected and stood up the enterprise vulnerability management platform, building Rapid7 InsightVM console and distributed scan engine infrastructure to extend assessment coverage across segmented network zones, then driving CVE remediation and patch cycles to verified closure.
- Investigate security alerts and correlate telemetry across Microsoft Sentinel and CrowdStrike Falcon, performing malware and threat analysis (ANY.RUN, VirusTotal) and Microsoft Purview eDiscovery investigations to separate true threats from false positives.
- Administer Okta as the enterprise identity provider and primary access control plane, covering SSO, MFA enforcement, user lifecycle, and per-application access policy, and led enterprise deployment of YubiKey hardware security keys to 1,100+ users to advance the organization from app-based MFA to phishing-resistant FIDO2 authentication.
- Support GRC and audit readiness for a Revenue Commission environment subject to IRS Publication 1075, applying safeguarding requirements to Azure and on-premises systems through security control review, access restriction and least-privilege enforcement,

Zscaler policy alignment, and control documentation, and contributed to a Plan of Action and Milestones (POA&M) tracking identified control gaps through remediation.

- Maintain security visibility into the enterprise AWS tenant, reviewing and triaging exposure surfaced by AWS GuardDuty and driving findings to the responsible owners, and currently extending Rapid7 InsightVM vulnerability assessment coverage into the AWS environment.
- Extended Zero Trust coverage to previously uncovered macOS and iOS fleets by deploying Zscaler Client Connector through Addigy MDM with authored PLIST configuration profiles, and root-caused a fleet-wide ZCC firewall and authentication failure to an IPv6 conflict, restoring Zero Trust connectivity without user disruption.
- Ran CIS-CAT Pro scans to assess systems against CIS Benchmarks and worked with the team to remediate the configuration gaps identified, applying the hardening to the standard golden image.
- Designed and published enterprise PKI certificate templates for certificate-based user and device authentication, and deployed Armis agentless asset intelligence for unified visibility across unmanaged, IoT, and specialty devices.

Advanced Business Solutions

Sep 2023 to Jan 2024

Tier II Engineer / Security Team Lead

- Managed endpoint security compliance and access policy in Microsoft Intune across a client base of 10,000+ endpoints and servers, identifying non-compliant systems and driving remediation to closure.
- Investigated and resolved Microsoft 365 account compromise incidents using CrowdStrike and Defender audit and sign-in logs, automated malicious inbox rule removal with PowerShell, and hardened affected accounts with MFA.
- Delivered prioritized risk and vulnerability findings from CrowdStrike Falcon and Microsoft Defender to Cyber Ops leadership, and authored knowledgebase documentation that reduced escalation volume.

GCS Technologies

Oct 2022 to Sep 2023

Information Technology Analyst II | Azure Security & Identity

- Designed advanced Azure Conditional Access policy sets across client tenants, including location-based geo-fencing, to enforce risk-based, least-privilege access to Microsoft 365 and Azure resources.
- Administered the full Azure identity lifecycle across client tenants, including Privileged Identity Management, Azure AD role assignment, MFA enforcement, and sign-in and audit log monitoring.
- Deployed and maintained DLP policies, Microsoft Defender for Endpoint, Defender for Identity, and Exchange Online Protection across an Azure-first environment.
- Raised Microsoft 365 Secure Score from baseline to 85%+ through CVE evaluation, patch management, and Attack Surface Reduction rule implementation, and remediated time-sensitive cloud incidents including O365 compromise and dark web credential alerts.

State of Louisiana, First Circuit Court of Appeals

Feb 2022 to Oct 2022

IT Support Specialist II

- Managed enterprise LAN/WAN and VoIP infrastructure supporting court operations and supervised network technicians on installation and performance analysis.

Exigo Technology Services

Nov 2020 to Feb 2022

Systems Engineer II

- Administered on-premises and cloud infrastructure across multi-site client environments (Windows Server, Linux, VMware, Citrix XenApp, SAN) and standardized patch management and backup operations, reducing exposure from unpatched systems.

PROJECTS & PROFESSIONAL INVOLVEMENT

- Built and published a browser-based PenTest+ exam simulation platform (1,200+ question bank, drag-and-drop performance-based questions, Bash/Python/PowerShell script analysis, instant scoring) hosted on GitHub Pages.
- Home lab: Proxmox with FortiGate VLAN segmentation and Wazuh SIEM for detection engineering and Zero Trust simulation.
- Founding Member, Kentucky Cyber Intelligence Information Initiative (KCI3), a regional threat intelligence sharing community. Active member, ISACA and ISSA Kentuckiana.

TECHNICAL SKILLS

Cloud & Identity: Microsoft Azure, AWS (GuardDuty), Okta (IdP, SSO, MFA, Lifecycle), M365 Admin, Entra ID / Azure AD, Conditional Access, PIM

Zero Trust & Network Security: Zscaler ZIA / ZPA / ZCC / ZDX / ZTPKI, Skyhigh CASB, Cisco (FTD, Umbrella, SecureX), Fortinet, Meraki, IDS/IPS, VPN, DNS/DHCP, TCP/IP

SIEM, Detection & Vulnerability Management: Microsoft Sentinel, Rapid7 InsightVM / InsightIDR, Wazuh, Tenable Nessus, Qualys, CIS-CAT Pro / CIS Benchmarks, CVE analysis, detection tuning, log correlation

Endpoint, EDR & MDM: CrowdStrike Falcon, Microsoft Defender for Endpoint / Identity / Cloud Apps, SentinelOne, Intune, ManageEngine, Addigy MDM

Data & Email Security: Microsoft Purview (DLP, eDiscovery), Exchange Online Protection, Proofpoint, Mimecast, SPF/DKIM/DMARC

Systems, Scripting & Tooling: Windows Server, Active Directory, Group Policy, macOS, Linux, PowerShell, Python, Nmap, Wireshark, TDX, VMware ESXi/vSphere
