

EARL "TREYE" PEATROSS III

Cloud Security | Security Engineering | Security Operations & GRC
Azure • AWS • Microsoft Sentinel • Zscaler ZIA/ZPA • Rapid7 • IRS Publication 1075

Clarksville, IN (Louisville Metro) • Open to Remote • 225.305.9780 • earlpeatross9639@outlook.com • linkedin.com/in/earlpeatrossiii

PROFESSIONAL SUMMARY

Cybersecurity professional with 15+ years in IT and 4+ years in dedicated security operations, securing a government enterprise of 5,000+ endpoints and servers. Scope spans security monitoring and investigation in Microsoft Sentinel, Zscaler ZIA/ZPA policy engineering, Rapid7 vulnerability management, Okta identity administration, cloud security visibility across Azure and AWS, and GRC work applying IRS Publication 1075 safeguarding requirements. B.S. in Cybersecurity and Information Assurance (conferred), 11 active certifications including CompTIA PenTest+ and CySA+, with the ISC2 CCSP exam scheduled. Targeting remote cloud security, security engineering, and cloud GRC roles.

EDUCATION & CERTIFICATIONS

Western Governors University | B.S., Cybersecurity and Information Assurance | Degree conferred 2026

Earned and Active (11): CompTIA PenTest+ • CySA+ • Security+ • Network+ • A+ • Project+ • ISC2 SSCP • ISC2 CC • ITIL 4 Foundation • LPI Linux Essentials • NVIDIA Building AI with Multimodal Models

Scheduled / In Progress: ISC2 CCSP (Certified Cloud Security Professional), exam scheduled. Not yet earned.

CORE TECHNICAL COMPETENCIES

Cloud, Identity & Zero Trust: Microsoft Azure, AWS (GuardDuty), Okta IdP (SSO, MFA, lifecycle, per-app access policy), FIDO2 / phishing-resistant MFA, Zscaler ZIA / ZPA / ZCC / ZDX / ZTPKI, ZTNA policy, SSL inspection, Skyhigh CASB; prior Entra ID, Conditional Access, PIM

SecOps, Detection & Vulnerability Mgmt: Microsoft Sentinel, Rapid7 InsightVM / InsightIDR, CrowdStrike Falcon, Microsoft Defender, Purview, alert triage and investigation, malware and threat analysis, CVE analysis, remediation to closure

GRC & Compliance: IRS Publication 1075, NIST, HIPAA, GDPR, CIS Benchmarks and CIS-CAT Pro, baseline hardening, POA&M contribution, security control review, access control governance, policy, documentation, audit readiness

PROFESSIONAL EXPERIENCE

Louisville Metro Government | *Information Security Specialist (Security Operations, Zero Trust Access & GRC)*

Jan 2024 to Present

- Own Zscaler policy operations (ZIA, ZPA, ZCC) across a 5,000+ endpoint government enterprise: investigate web blocks, URL and category policy denials, SSL inspection conflicts, and ZPA application access failures, determining whether a security control or the application itself is breaking legitimate business access, then tuning policy so users are restored without weakening the control set.
- Took ownership of a vulnerability identified during a penetration test of the environment: investigated the affected systems, implemented the immediate fix to close active exposure, coordinated with system owners, and scoped the deeper remediation now in progress.
- Architected and stood up the enterprise vulnerability management platform, building Rapid7 InsightVM console and distributed scan engine infrastructure to extend assessment coverage across segmented network zones, then driving CVE remediation and patch cycles to verified closure.
- Support GRC and audit readiness for a Revenue Commission environment subject to IRS Publication 1075, applying safeguarding requirements to Azure and on-premises systems through security control review, least-privilege access enforcement, and control documentation, and contributed to a POA&M tracking identified gaps through remediation.
- Investigate alerts and correlate telemetry across Microsoft Sentinel and CrowdStrike Falcon, performing malware and threat analysis (ANY.RUN, VirusTotal) and Purview eDiscovery investigations; maintain security visibility into the enterprise AWS tenant via GuardDuty and am extending Rapid7 InsightVM coverage into AWS.
- Administer Okta as the enterprise identity provider covering SSO, MFA enforcement, lifecycle, and per-application access policy, and led deployment of YubiKey hardware security keys to 1,100+ users, moving the organization from app-based MFA to phishing-resistant FIDO2 authentication.
- Ran CIS-CAT Pro scans to assess systems against CIS Benchmarks and worked with the team to remediate the configuration gaps identified, applying the hardening to the standard golden image; also extended Zero Trust coverage to macOS and iOS fleets via Addigy MDM and published enterprise PKI certificate templates.

Advanced Business Solutions | *Tier II Engineer / Security Team Lead*

Sep 2023 to Jan 2024

- Managed endpoint security compliance and access policy in Microsoft Intune across a client base of 10,000+ endpoints and servers, identifying non-compliant systems and driving remediation to closure.
- Investigated and resolved Microsoft 365 account compromise incidents using CrowdStrike and Defender audit and sign-in logs, automated malicious inbox rule removal with PowerShell, and delivered prioritized risk findings to Cyber Ops leadership.

GCS Technologies | *Information Technology Analyst II*

Oct 2022 to Sep 2023

- Designed advanced Azure Conditional Access policy sets including location-based geo-fencing and administered the full Azure identity lifecycle across client tenants (Privileged Identity Management, Azure AD role assignment, MFA enforcement, sign-in and audit log monitoring).
- Deployed DLP policies, Microsoft Defender for Endpoint and Identity, and Exchange Online Protection across an Azure-first environment, raising Microsoft 365 Secure Score from baseline to 85%+ through CVE evaluation, patch management, and Attack Surface Reduction rules.

Earlier Experience | *State of Louisiana, First Circuit Court of Appeals* | *Exigo Technology Services*

2020 to 2022

- IT Support Specialist II and Systems Engineer II: managed enterprise LAN/WAN and VoIP infrastructure for court operations, and administered on-premises and cloud infrastructure (Windows Server, Linux, VMware, Citrix, SAN) with standardized patch and backup operations across multi-site client environments.

TECHNICAL SKILLS

Cloud & Identity: Azure, AWS (GuardDuty), Okta, M365 Admin, Entra ID / Azure AD, Conditional Access, PIM | **Network Security:** Cisco (FTD, Umbrella, SecureX), Fortinet, Meraki, IDS/IPS, VPN, DNS/DHCP, TCP/IP

SIEM & Vulnerability: Microsoft Sentinel, Rapid7 InsightVM / InsightIDR, Wazuh, Tenable Nessus, Qualys, CIS-CAT Pro | **Endpoint:** CrowdStrike Falcon, Microsoft Defender, SentinelOne, Intune, ManageEngine, Addigy MDM, Armis

Data, Systems & Scripting: Microsoft Purview (DLP, eDiscovery), Exchange Online Protection, Proofpoint, Mimecast, SPF/DKIM/DMARC, Windows Server, Active Directory, Group Policy, macOS, Linux, PowerShell, Python, Nmap, Wireshark, TDX, VMware
